

# Screen Enhancement Tool for SAP Business One

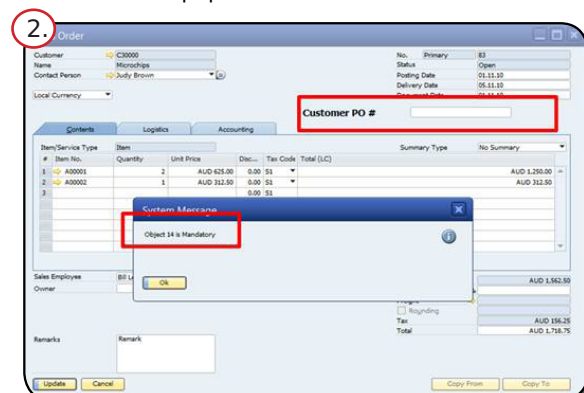

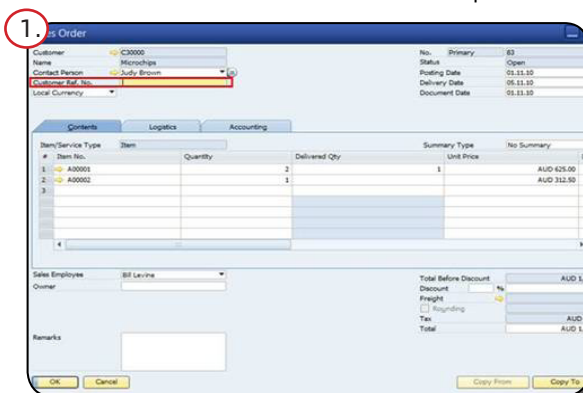

SAP Screen Enhancement Tool (SET) - is a tool that can make your SAP Business One users even more productive. SAP SET enables user defined fields to be moved to the main screen area, buttons to be added to launch other SAP Business One screens and much more.

## Features List:

- Make fields mandatory
- Set default values on fields
- Update or set field data based on conditions
- Moves position of fields and/or buttons
- Rename fields and/or buttons
- Apply colours & fonts
- Display UDFs on the main screen
- Create function buttons to open screens, reports, queries

Order button on the BP screen - opens the Sales Order and auto populates the customer code.

1. Standard Sales Order screen with customer reference field highlighted.
2. Customer ref. no. field has been renamed to 'Customer PO#' and moved over to the right side. On Add/Update of order a message displays that this is a mandatory field.
